Software Engineer

Software Engineer with 2.5+ years of experience building scalable full-stack applications using TypeScript, Next.js, NestJS, and PostgreSQL. Experienced in API design, microservices, authentication, performance optimization, and building reliable production systems.

WORK EXPERIENCE

Ornate Oasis Sdn. Bhd. **01/2025 - 06/2026**
Full-stack Developer • Full-time **Kuala Lumpur, Malaysia**

Tech Stack: TypeScript, Next.js, NestJS, Tailwind CSS, PostgreSQL

- Upgraded scalable full-stack features using Next.js and NestJS microservices, improving API response time by ~25% through query refinement and caching.
- Designed and executed authentication & role-based authorization (RBAC) flows supporting 5+ user roles.
- Refined database queries and indexing strategies, reducing slow queries by 30%.
- Improved frontend performance (lazy loading, code splitting), decreasing initial page load time by 20%.
- Applied clean architecture and modular coding practices, reducing bug recurrence rate in new features.

Yuzee **10/2024 - 12/2024**
Test Automation Engineer • Internship **Kuala Lumpur, Malaysia**

Tech Stack: Cypress, Postman, GitHub Actions

- Authored and maintained 50+ end-to-end and integration test cases using Cypress, improving test coverage.
- Streamlined API validation workflows using Postman collections, improving backend reliability.
- Expanded regression test coverage by ~35%, reducing manual QA effort.
- Integrated test pipelines into GitHub Actions CI/CD, reducing release validation time by 40%.

Tyrell Systems Sdn. Bhd. **07/2024 - 09/2024**
Backend Developer • Internship **Kuala Lumpur, Malaysia**

Tech Stack: CakePHP, MySQL, PHPUnit, XDebug

- Executed and refined backend features using CakePHP and MySQL in a team-based environment.
- Built authentication, authorization, and database migrations for production endpoints.
- Authored unit tests using PHPUnit, improving API reliability and reducing post-release defects.
- Debugged complex issues using XDebug, reducing issue resolution time by ~20%.

AheadVision **01/2024 - 06/2024**
Web Developer • Internship **Antalya, Turkiye**

Tech Stack: React.js, Tailwind CSS, Bootstrap

- Delivered responsive websites for 3+ small business clients using React.js.
- Created 10+ reusable UI components in React.js and Tailwind CSS, reducing development time for new client features by ~30%.
- Fine-tuned mobile responsiveness and UX consistency across client websites.

EDUCATION

Bachelor's Degree in Computer Science (Software Engineering)
Universiti Tenaga Nasional (UNITEN) • GPA: 3.59/4.00 Kajang, Selangor, Malaysia • 09/2021 - 10/2024

- Achieved **Dean's List** for 5 semesters
- Received **Certificate of Excellence** for Outstanding Achievement in Final Year Project
- Awarded **Certificate of Appreciation for Exceptional Commitment and Creativity** in organizing *UNITEN International Cultural Night 2023 (UICN2023)*

PROJECTS

Hakyda Auto

Freelance

- Developed and maintained features for a live WordPress car import platform serving customers in the Commonwealth of Independent States (CIS) and the United Arab Emirates (UAE).
- Diagnosed and resolved production bugs in PHP, JavaScript, and CSS.

Tech: WordPress, PHP, JavaScript, CSS

Link: hakydaauto.com

Tangle

Personal Project

- Built a full-stack social media platform with Next.js and TypeScript, including rich-text posts, photo and video uploads, and real-time private and group messaging.
- Implemented Google OAuth and session-based authentication, and modeled users, posts, follows, and notifications in PostgreSQL using Prisma.
- Built infinite-scrolling feeds and used TanStack Query to update likes, bookmarks, and follows immediately while server requests completed.

Tech: Next.js, TypeScript, PostgreSQL, Prisma, NextAuth

Link: tangle.yusuprd.com

Qalb

Personal Project

- Built a cross-platform Islamic companion app for iOS and Android with English and Russian localization, location-based prayer times, scheduled notifications, and a sensor-based Qibla compass.
- Implemented offline Quran reading and search using SQLite, with background synchronization that downloads content updates from a versioned REST API.
- Developed a NestJS backend with Redis caching and third-party API integrations for nearby mosque search, route estimates, and live gold and silver prices.

Tech: React Native, Expo, TypeScript, Node.js, NestJS, SQLite, Redis
